computer Accounts Payable Checks

Reduce payment errors

voucher section allows thirteen lines (68 characters each) to show how net amount was calculated.

Saves time

duplicate and triplicate sets have carbons in position, ready-to-use — one printing provides checks and an exact record of payment.

Low cost

prices include printing your firm name and address, your bank's name and number, consecutive numbering and MICR encoding.

Maximum security

both check and voucher are preprinted with the same consecutive numbers, plus space for computer control numbers.
